

RAYNOR Sit-stand Table

The Raynor Sit-stand Table is a sturdy table/desk that functions as well as it looks. With one of the industry's best rated weight capacities (300 lbs.), and quiet-track dual motors, you can easily adjust your desk from a seated height of 29 inches up to a standing height of 48 inches. Our control pad has 4 presets for a one-touch adjustment to your preferred desk height. The control pad can also slide under your desk top when not in use.

Safety features include an anti-collision mechanism, two additional steel cross frame supports, large 3 inch diameter glides and protective end-caps over steel bases.

Wire-management is standard with RAYNOR Sit-stand Tables to help you set-up, and organize your cables and wires. Choose from our standard white, silver or black powder coat paint finishes, and a variety of laminate top colors and sizes to create your own unique design.
